PROFILE

I am an undergraduate at IIC University, passionate about technology and innovation. As a full-stack developer, I have a solid foundation in both front-end and back-end development, allowing me to create comprehensive web applications. I am eager to apply my skills to real-world projects, continuously learning and adapting to new challenges in the ever-changing tech landscape.

PROJECTS

Event Lanka

Developed a platform for event management, utilizing Java for backend logic, Firebase for real-time data, and SQLite for local storage.

Tech: Java | Firebase | SQLite

Rawana Health Care Center

Created a healthcare management system with Java and Swing for the UI, and MySQL for efficient data handling.

Tech: Java | Swing | Java | MySQL

Christ E-Commerce Site

Built an e-commerce website using HTML, CSS, and JavaScript for frontend, Bootstrap for styling, Java for backend, and MySQL for database management.

Tech: Html | Css | JavaScript | Bootstrap | Java | MySQL

Chat Room

Designed a mobile chat application with React Native for the interface, Java for backend support, and MySQL for data storage.

Tech: React-Nativ | Java | MySQL

Book Store Management System

Developed a book store management system using React.js for the frontend, Node.js and Express.js for the server, and MongoDB for database operations.

Tech: React.js | Css | Node.js | Express.js | MongoDB
